

REFRIGERATORS & FREEZERS

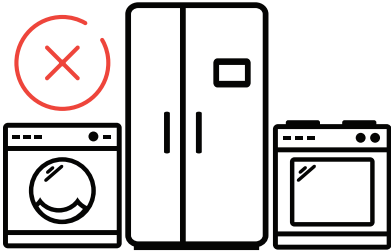

Check / clean door seal regularly

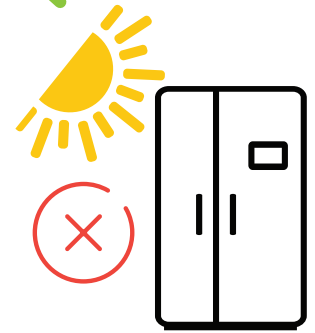

Make sure your refrigerator door closes tightly

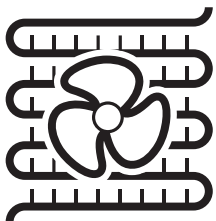

Ensure unit is located where air can flow freely around it

Keep away from heating appliances (ovens dishwasher etc)

Do not place in direct sunlight

Clean condenser coils twice a year

5°C - 10°C

2°C - -5°C

Ensure cooling compartment is kept between 5°C and 10°C and the freezing compartment between 2°C and -5°C

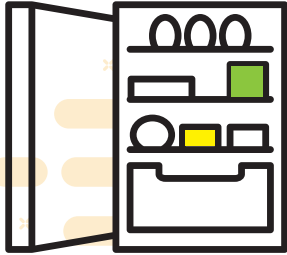

Defrost, do not allow frost to build up in freezing compartment

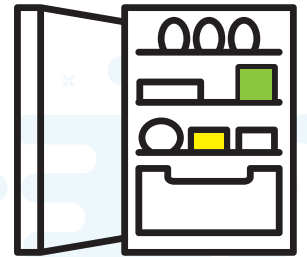

REFRIGERATORS & FREEZERS

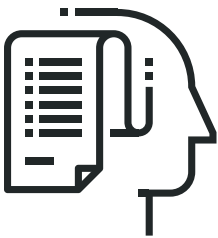

Label food clearly so it can be quickly removed

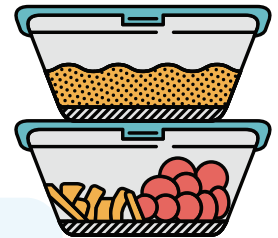

Place frequently used items in the front of the refrigerator or freezer

Store products loosely to allow proper air circulation

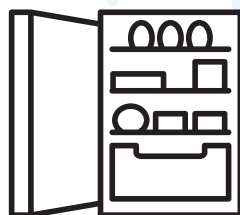

Make a mental list of things you need before you open your unit

Wrap foods properly to avoid excess frost formation

Only open your unit when necessary

Cool very hot foods at room temperature first before placing in unit
