

NEW APPLIANCES

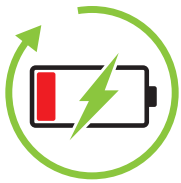

Always check for the Energy Efficiency Rating (EER), higher numbers mean more efficiency

Keep appliances in good working order

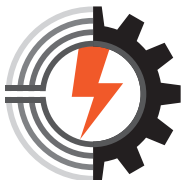

Always turn off appliances when not in use

Rechargeable appliances generally use **more energy** than plug in ones

Energy efficient appliances cost more to purchase but pay for themselves via lower energy bills

Use power management features to power down appliances to their lowest energy use

Use a power strip so you can turn on and off multiple appliances with one switch
